Vanovskaya Kara Zhila Margelan Gorchakova Skobelovo Fergana

This road was 5-5.5 meters wide and had a gravel surface from Kokand to Gorchekove. From Gorchekova to Forgana the surface was asphalt. There were two drainage ditches, which were 1-1.5 meters wide and 0.70-1 meter deep, on either side. These were also used for the irrigation of fields bordering the read.

- 5. About 8 kms east of Molotovo over the Sokh Canal was a wooden single span bridge supported by two concreto pillars at either end. It is 20 meters long, 4 to 4.5 meters wide, and about 4 meters above water level.
- 6. The road was well maintained except for the stretch between Kara Tyube and Kara Zhile, which was full of holes. Vehicles took between 32 and 4 hours to cover the distance of 85 km between Kokand and Fergana.
